

# TALENCO TRANSFORMER DEPARTMENT

Talenco Transformer Department was founded in 2020 by Talenco CEO Jens Hendrickx in collaboration with a team that has extensive knowledge and experience within the transformer business.

The main focus of our department is to offer services such as repairs, maintenance, engineering, commissioning and sales of spare parts. The highest quality and flexibility are central to all these activities.

**The continuous and reliable functioning of transformers is essential to ensure your business operations and success.**

Preventive maintenance is therefore an absolute necessity and the only way to maximize the lifecycle of your transformer.

Our transformer experts, technicians and project management teams with more than 25 years of experience in these activities guarantee the customer maximum quality, both onshore and offshore.

## OUR TEAM

**Jelle De Clercq**  
Department &  
Commissioning  
Manager

**Liesbeth Verelst**  
Operations  
Manager

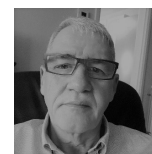

**Kristof Vissers**  
Project Manager

**Sven Lambrechts**  
Project Manager

**David Peeters**  
Quotation &  
Project Engineer

**Roger Liekens**  
Business  
Development  
Manager

**The service your transformer deserves**

Innovating industrial solutions

# ONZE DIENSTEN

## COMMISSIONING & ANALYSE

- › Functionality control of accessories and protections (Buchholz, DGPT, OTI, WTI, fans, ...)
- › Electrical measurements (Ratio, winding resistance, dynamic OLTC scan, insulation resistance, capacitance & Tgδ, SFRA, CT measurements, ...)
- › Perform on-site high voltage tests (PD measurement, applied voltage test, loss measurements, ...)
- › Oil sampling and analysis (breakdown voltage, moisture content, PCB, furan derivatives, DGA - dissolved gases, ...)
- › Fault analysis & diagnosis
- › Full SAT/HAT execution
- › 24/7 Support

## ONDERHOUD & HERSTELLING

- › Preventive maintenance on all types of transformers and control switches (OLTC)
- › Replacement of all types of seals, insulators, fans, pumps, coolers, ...
- › Repair of all possible defects (repair control switches, leaks, ...)
- › Oil treatment: drying, degassing and filtering (streamliner up to 9000 l/h)
- › Carrying out full refurbishments/retrofit
- › 24/7 Support

## MONITORING

- › Authorized distributor of VAISALA Power Products in Belgium (sales, installation and service)
- › Installations and services of online PD analysis equipment

## MONTAGE & DEMONTAGE

- › Installation of all types of transformers (regardless of manufacturer)
- › Oil filling and handling (streamliner up to 9000 l/h)
- › Moving & exchanging transformers
- › Disassembly and scrapping of transformers in collaboration with certified processing company
- › Removal/processing of transformer related hazardous substances (contaminated oil/asbestos)

## ENGINEERING & RELIABILITY

- › Full refurbishments/Retrofits
- › Modifications
- › Inventory of transformer park
- › Drawing up a maintenance program
- › Sales of new transformers
